Disclaimer

IceJoy (\$EJOY) is a community-driven digital asset deployed on Base Chain. This document is for informational purposes only

and does not constitute financial advice, investment solicitation, or guarantees of returns. Cryptocurrency investments are speculative and highly volatile. Participants should perform independent research and exercise caution.

Executive Summary

IceJoy (\$EJOY) is a fixed-supply meme-inspired digital asset built on Base Chain. It combines virality, community engagement, and structured tokenomics to create a resilient and exciting meme ecosystem.

The total supply of IceJoy is 1,000,000,000 tokens, fully fixed with no minting or inflation. Scarcity is enforced from the start, ensuring value integrity for long-term holders.

IceJoy represents a cool, calculated hype, blending meme culture with community-driven growth and transparent deflation mechanisms.

Vision

“Cool heads rise above the heat.”

IceJoy embodies resilience, community strength, and controlled momentum. In Base Chain’s fast-moving ecosystem, the token aims to capture identity, excitement, and loyalty, giving holders a shared narrative of endurance, fun, and memetic energy.

Brand Identity

IceJoy’s symbol, the Frosted Flame, represents a balance of energy and

composure. The icy core represents controlled power, the surrounding aura reflects the community's shared influence, and the flickering sparks symbolize viral growth.

Community members are collectively called JoyGang, reflecting loyalty, enthusiasm, and the spirit of the project.

Tokenomics

The total supply of IceJoy is 1,000,000,000 tokens. Allocation is designed to ensure liquidity, community engagement, ecosystem growth, and team alignment:

Liquidity Pool:

450,000,000 tokens (45% of total supply) are deployed on Base Chain DEXs with locked liquidity to ensure trust.

Community Rewards:

200,000,000 tokens (20% of total supply) incentivize holders through competitions, memes, and engagement activities.

- **Marketing and Growth:**

150,000,000 tokens (15% of total supply) support promotional campaigns, influencer collaborations, and viral initiatives.

- **Ecosystem Development: 100,000,000 tokens (10% of total supply) fund strategic partnerships, staking features, and platform integrations.**

- **Team (Vested): 50,000,000 tokens (5% of total supply) are vested to ensure long-term alignment with the community.**
- **Strategic Partnerships: 50,000,000 tokens (5% of total supply) support collaborations and exchange listings.**

Deflation Mechanism

IceJoy uses milestone-based burns to reduce circulating supply and reward the community:

- **Upon reaching 5,000 holders → 1% burn**
- **Upon reaching 20,000 holders → 2% burn**
- **Upon reaching 50,000 holders → 3% burn**
- **Major listing or ecosystem milestone → community-voted burn**

All burns are executed on-chain and permanently reduce total supply, reinforcing scarcity.

Liquidity and Security

Liquidity is deployed with transparency and locked to prevent tampering. The contract contains no hidden mint functions. Token allocation, burn events, and milestone updates are fully auditable on-chain to maintain trust.

Roadmap

Phase One – Frost:

Launch on Base Chain, liquidity deployment, and early community activation, paired with

viral meme campaigns.

Phase Two – Chill:

Growth initiatives, influencer collaboration, first burn milestone, and community competitions.

Phase Three – Blaze:

Staking launch, NFT release, and governance framework implementation.

Phase Four – Eternal Frost:

DAO launch, ecosystem integrations, and strategic partnerships for long-term sustainability.

Governance

IceJoy is designed to transition gradually to community governance. Token holders will be empowered to vote on key decisions such as burn approvals, marketing allocations, ecosystem initiatives, and partnership approvals, ensuring the community shapes the future of the token.

Risk Disclosure

Participants acknowledge that IceJoy is subject to high volatility, early-stage liquidity risk, meme-driven price fluctuations, and regulatory uncertainties. There are no guaranteed financial returns. Participation is at the individual's own risk.

Closing Statement

IceJoy is more than a meme token — it is a narrative of resilience, fun, and viral energy. Markets fluctuate, trends change, and memes evolve, but IceJoy's frost and flame endure.
